

Solvias hands over its hazardous monitoring business to Chemlys.

Kaiseraugst (Switzerland) & Venissieux (France), September 26th 2023 – After more than 2 decades in the field Solvias AG hands over its chemical hazardous monitoring business to French GC and MS expert company Chemlys to ensure continuous and safe chemical hazards monitoring for our precious clients.

Solvias AG, an internationally recognized provider of integrated solutions in contract analytical research, development and manufacturing decided to hand over its chemical hazardous monitoring business to Chemlys, a French enterprise focusing on sales, services and applications support on GC, Micro GC, Mass spectrometry products for the gas analysis market. This step will ensure business continuity and a high service level for customers.

The use and monitoring of hazardous substances is standard for many chemical manufacturing environments. Safety can only be achieved by applying the appropriate technology and know-how. With a comprehensive package of services and high-performance products, Solvias acted as a valued partner over 2 decades to ensure continuous and safe chemical hazards monitoring, providing, e.g. customized expert consulting, analytical method selection, method implementation, calibration, commissioning, on-site method optimization to local operating conditions, instruction and training of local operators as well as service and maintenance. In addition, chemical hazard monitors were developed and established in the market recording exposures from the ppm to the ppt range and trigger alarms when limits are exceeded – for increased safety in the workplace.

Solvias is delighted that Chemlys as an expert company will take over the hazardous monitoring business and therefore allows continuation of the high quality, reliable services and products and therefore ensures the safety in our customer's production environments.

About Solvias AG

Solvias is an internationally recognized provider of integrated solutions in contract analytical research, development and manufacturing. The company offers a broad spectrum of services and solutions in the Pharmaceutical, Biotech, Medical Device, Cell&Gene Therapy and Cosmetic industries. With headquarters near Basel, Switzerland, over 800 highly qualified employees take pride in putting science at the heart of serving customers to bring safer and better products to market faster.

Our laboratories operate to the highest standards and in accordance with ISO, GMP, GLP and FDA regulations. Drawing on a proven 20-year track record of scientific excellence, we provide integrated services to develop, analyze and test a wide range of chemical substances and biopharmaceuticals.
